

## CONTROL COMPUTERS WITHOUT THE THREAT OF CROSS-CONTAMINATION

Perfect for  
Healthcare Facilities

Tripp Lite's Cleanable, Flexible Keyboards are designed to function in all healthcare environments, whether outside or inside of patient-care areas. The keyboards are built to withstand washing, disinfecting and autoclaving, which helps eliminate the threat of cross-contamination.

- Indestructible silicone material withstands repeated autoclave washing (up to 230° F of steam heat), dishwashing and disinfecting (including wiping and submersing in hospital-approved disinfectants), remaining undamaged by even the most powerful healthcare chemicals
- Sealed, waterproof design is impervious to soil and liquids, operating normally even after being fully submerged

### Tripp Lite Cleanable, Flexible Keyboards Are Also Ideal for Other Industries

**AUTOMOTIVE**

**INDUSTRIAL**

**EDUCATION**

**RETAIL**

**RESTAURANT**

**Cross-contamination is a real threat within healthcare facilities.**

“Keyboards harbor over 3,000 germs per square inch.”

*Dr. Charles Gerba  
University of Arizona*
