Network Surge Protector - Essential protection for data and communication lines

MODEL NUMBER: **DB25-PAR**

Description

Tripp Lite's DB25-PAR offers dataline surge suppression for many DB25 parallel ports. Protects pins 1-25 and D shell chassis for protection of parallel DB25 ports. User configurable for use with male or female captive DB25 ports. Convenient DB25 input and output connects directly to the protected port, obtaining a ground outlet from the computer chassis. Surge suppression is handled with balanced arrays of high-speed avalanche diodes that divert excess energies created by electrostatic discharges away from network interface connections. Tripp Lite network surge suppressors reduce blown interface connections, garbled transmissions, system lock-ups and hard equipment failure by safely shunting dataline surges to ground. Lifetime warranty.
SUPPRESSION: Reversible DB25 m/f jacks, protects pins 1-25 and chassis, 7.5V clamping
