8.6kW 3-Phase Monitored PDU, 208/120V Outlets (36 C13, 6 C19 & 3 5-15/20R), NEMA L21-30P, 3 ft. Cord, 0U Vertical, TAA

MODEL NUMBER: **PDU3VN3L2130**

High-capacity 8.6kW PDU powers high-density data center equipment racks. LED display and Ethernet interface help you monitor load levels with billing-grade accuracy to prevent PDU and circuit overloads that cause downtime.

Description

The PDU3VN3L2130 8.6kW 3-Phase Monitored PDU features 45 outlets for distributing network-grade 208/120V AC power to rack-mounted network devices, including computers, servers, routers and switches. Outlets are arranged in six load banks: 36 C13 208V and six C19 208V outlets divided evenly into three banks and three NEMA 5-15/20R 120V outlets, each in its own bank.

A built-in SNMPWEBCARD enables full remote access for power monitoring, configuration, control and notifications 24 hours a day via secure web browser, telnet or SSH, as well as real-time load/current data with billing-grade accuracy (+/- 1 percent). Tiered access privileges allow both an administrator and a guest to log in. Automated alerts help prevent accidental overloads, power loss and downtime. Digital LED display indicates amps, kilowatts, volts and power unbalance percentage, as well as temperature and humidity conditions when using the optional ENVIROSENSE module (sold separately).

Protocols supported include HTTP, HTTPS, PowerAlert®, SMTP, SNMPv1, SNMPv2, SNMPv3, telnet, SSH, FTP, DHCP, BOOTP and NTP. Network settings can be assigned automatically or manually.

Ideal for three-phase network configurations in high-density data centers and heavily configured equipment racks, the PDU3VN3L2130 mounts vertically in 0U of rack space using the pre-installed buttons or included hardware. The NEMA L21-30P input plug with three-foot cord connects to a compatible AC power source, generator or protected UPS.
