## Model #: USA-28XG

### USB Twin Serial Adapter for Macs Keyspan by Tripp Lite

### Highlights

- Connect serial devices to the USB port on your Mac
- Provides two RS-422 MiniDin8 serial ports
- Supports data rates up to 1 Mbps
- Qualified for use with Final Cut Pro

### Description

There is good reason why we sell more Mac USB serial adapters than any other company. We've been making PCI serial cards and USB serial adapters for Mac OS for more than 10 years!

Our USB Twin Serial Adapter is recommended by dozens of serial device manufacturers and has been certified by Apple for use with Final Cut Pro.

#### System Requirements

Macintosh:

- An available USB port
- Mac OS 8.6 or greater
- Mac OS X (10.2.8, 10.3.9, 10.4 or greater)

For use with RS-232 and RS-422 serial devices including modems, graphics tablets, video decks, serial PDAs, serial printers, GPS devices, and medical/scientific instrumentation. Does not support AppleTalk/Local Talk. Some serial devices, including many serial printers, do not have drivers for Mac OS X and therefore will not operate under Mac OS X. Check with the serial device manufacturer to confirm that Mac OS X is supported. (For Epson Stylus Printers, use our USB Parallel Printer Adapter if running Mac OS X.)

#### Package Includes

- Adapter (USA-28XG) with built in USB cable
- CD with driver software and user guide

### Features

- Plugs into a USB port on your Mac
- Provides two RS-422 ports for connection to serial devices
- Supports data rates up to 1 Mbps
- Draws power from the USB connection -- a power adapter is not required
- Has been qualified by Apple, Avid and others for connection to video decks
- Supports use of multiple adapters on one Mac

## Specifications
