Assembly

- 2 A** Flip the workstation onto its rear side so it stands upright. For improved stability and traction, attach the washers, mounting feet and hex screws. Secure hardware with the included 4 mm hex key.

- 2 B** Using scissors or other sharp tool, cut the zip ties securing the workstation.

Assembly

- 3** Press both workstation handles to raise or lower the unit.

Assembly

- 4** Place monitors, keyboard and/or laptops onto the workstation.

Keep monitors and laptops placed firmly in the center of the top surface. Allowing any part of the equipment to hang off the edge may result in property damage and/or personal injury.

Make sure to raise the unit slowly. Raising the workstation too quickly may create an unstable situation resulting in property damage and/or personal injury.

Assembly

- 5** Attach the cable management clamp to the rear side of the keyboard tray. Route keyboard and mouse cables through the clamp, as needed.

Assembly

- 6** Use the included zip ties to bundle and organize equipment cables

Turn side knob clockwise or counter-clockwise if the latch cannot lock into the notch properly.

Leave enough cable slack to allow for full range of vertical motion (15" / 38 cm). Failure to heed this warning may result in property damage and/or personal injury.

To avoid the potential to pinch cables, it is important to follow the cable routing instructions in this manual. Failure to follow these instructions may result in equipment damage and/or personal injury.

WARNING

PINCH POINT

DO NOT place hands on or near support bars. Pinch points are created during lifting and lowering the worksurface. Failure to follow these instructions may result in serious personal injury.
