

Network Management Developer

We are always looking for motivated individuals to join our software development team to help create our embedded network connectivity firmware and SNMP network management software.

Candidates should possess most, if not all, of the following skills/qualifications:

- BS or advanced degree in computer science or related field
- 3+ years of experience with embedded systems development, including multi-threaded, object-oriented programming techniques using an RTOS, such as Thread X; ARM7 experience is a plus
- 3+ years of experience with IP-based software development
- SNMP V1.0, V2.x and V3.0; familiarity with RFC1628 is a plus
- Familiarity with Telnet, SMTP and HTTP/HTTPS
- Familiarity with security libraries such as TLS 1.0, SSL and SSH required
- Experience with RS232 (communication port) and USB required; experience with HID power device compliance is a plus
- 3+ years of experience with Windows/Linux application development
- C++ and Java experience required
- Familiarity with network security is helpful

Please email your resume to careers@tripplite.com. We always have opportunities for great candidates.
