

Protect It! 7-Outlet Surge Protector, 12 ft. Cord, 1080 Joules, Diagnostic LED, Black Housing

MODEL NUMBER: TLP712B

Safeguard your computer, printer, scanner, router, modem and other small home electronics against dangerous surges, spikes and line noise.

Description

Perfect for your home or office workstation, the TLP712B Protect Itl® 7-Outlet Surge Protector features a surge protection rating of 1080 joules to defend your sensitive electronic components against strong surges and spikes.

Because residential power outlets have three wires—hot line (H), neutral (N) and ground (G)—the TLP712B protects all three, covering the two protection modes: full normal mode (H-N) and common mode (N-G/H-G). It also filters out electromagnetic interference (EMI) and radio frequency interference (RFI) that can disrupt your electronics and inflict hardware damage or data loss.

Your devices plug into seven NEMA 5-15R outlets, one of which is spaced apart to accept a bulky transformer without blocking adjacent outlets. An integrated 15A circuit breaker protects all outlets and shuts down connected equipment in case of overload. The lighted on/off switch provides one-touch control over connected equipment. A diagnostic LED confirms your connected equipment is protected. The 12-foot (3.7-meter) AC power cord with NEMA 5-15P plug gives you enough flexibility to reach distant outlets while fitting easily into your workstation or home theater setup. Keyhole slots incorporated into the bottom panel provide convenient wall or desk mounting options for the black plastic housing.
