Important: Before installing the side panels, you must install a latch (included) in each side panel.

1. Working from the outer surface of the side panel, insert the upper portion of the latch into the side panel cutout as shown.

2. Push the lower portion of the latch into the side panel cutout as shown.

3. Snap the latch into place. The latch should be flush with the outer surface of the side panel. Repeat the process for each side panel.

Note: To install the side panels, follow the instructions in the rack enclosure owner’s manual.
