Quick Start Guide

Industrial Connectivity Solutions

See page 2 for a complete model listing.

Tripp Lite’s industrial connectivity solutions comply with the IP44 standard for protection against water intrusion on all sides, as well the IP68 standard for protection against invasive dust, dirt and sand, and submersion in up to 1.5 m of water for up to 60 minutes.

Note: Certain product combinations are needed to achieve IP44 and/or IP68 standards. See section 4. Product Combinations for IP44 and IP68 Protection for more information.

IP68 Protection rating is based on manufacturer’s guarantee.

**WEEE Compliance Information for Tripp Lite Customers and Recyclers** *(European Union)*

Under the Waste Electrical and Electronic Equipment (WEEE) Directive and implementing regulations, when customers buy new electrical and electronic equipment from Tripp Lite they are entitled to:

- Send old equipment for recycling on a one-for-one, like-for-like basis (this varies depending on the country)
- Send the new equipment back for recycling when this ultimately becomes waste

Use of this equipment in life support applications where failure of this equipment can reasonably be expected to cause the failure of the life support equipment or to significantly affect its safety or effectiveness is not recommended.

The Tripp Lite has a policy of continuous improvement. Specifications are subject to change without notice. Photos and illustrations may differ slightly from actual products.
